

5Kg Cocopeat Block

Coco peat / Coir pith is a byproduct gained during extraction of Coir fiber from coconut husk and used as a perfect organic medium to recondition soil in horticulture to germinate seeds cutting, seeding and plants, entire growing media for vegetable, flower cultivation, farms, greenhouses as well as used in potting mixtures and soil conditions. Hydrate the blocks slowly by using 25 liters of water and allow the moisture to be fully absorbed. Once the block is completely reconstituted to get the yield 60 – 75 liters.

Coco peat can be pressed in diverse forms after drying. One of the compressed forms is 5 kg cocopeat Block. It has the moisture capacity below 25 %. This product is available washed or non-washed material and delivery possible on pallets.

Advantages:

- 100% natural organic growing medium which gives a higher volume when compressed.
- High Expandability of Compressed Cocopeat 5Kg Blocks.
- Can be mixed with sand, compost, and fertilizer to make good quality potting soil.
- Best to use for Gardening, Landscaping, Golf Course & Turf Dressing, Animal Bedding, Mushroom/ Vegetable/ Flower cultivation, farms, and green houses
- Helps to keep the soil loose and airy, helping in better root growth.
- Dry Coco peat is very hydrophilic and quickly absorbs water making it easy to use.
- No Chemical added and no disposal problems as it is 100% biodegradable.

Product Name	Cocopeat 5Kg Block	
Type	Coconut Peat	
Form	Block	
Material	100% Cocopeat or customer specifications	
Moisture	Less than 20%	
EC Level	As per Customer spec	
Packing	With handle bag, inserting color label or Naked	
Weight	5 kg, As Buyer's request	
Use for	Vegetable, Flower cultivation, Farms, Greenhouses	
Season	Farming Seasons	
Size	29x29x14cm	
Services	OEM / ODM / Private Label	
Customization	Possible	

Specifications can be changed with the buyer's preferences

4.5Kg Husk Chip Block

Husk chips (Coir Mulch) produced from the husks at the outer layer of coconut nut consists of long fibers and sponge-like pith particles. Coconut husk chips which are ideal for potting mixer to increase air fill porosity and water holding capacity. Husk Chips are ideal for home gardening, horticulture especially for orchids, Bromeliads, Gerbera, Anthurium, Clivia, Roses, etc. Hydrate the blocks slowly by using water and allow the moisture to be fully absorbed. Once the block is completely reconstituted, you will get the yield of liters.

Advantages:

- Coconut husk chips hold water and air like a sponge
- Excellent drainage, high cation exchange capacity (CEC)
- Cuts down fertilizer application up to 30%
- Prevents stress after repotting
- Neutral pH and innate buffering capacity
- Resists fungal growth
- 100% natural and renewable resource

Product Name	Husk-chip 4.5Kg Blocks
Type	Coconut Husk-chips
Form	Blocks
Material	100% Husk Chips
Moisture	Less than 20%
EC Level	As per Customer spec
Used for	Vegetable, Flower cultivation, Farms, Greenhouses
Season	Farming Seasons, and for Terrarium
Packing	With handle bag, inserting color label or Naked
Weight	4.5 kg, As Buyer's request
Size	29x29x14cm
Services	OEM / ODM / Private Label
