

## Cocopeat Briquettes

Briquettes are specially produced for retail markets for home gardening and hobby growers for gardening, cropping and all horticulture and hydroponic as potting mixture or soil conditioner. Briquettes are perfect for a variety of flowering, vegetable and fruits nurseries and ornamental plants as well as other indoor and outdoor plant for the retail market and commercial nurseries. The highest compression ratio 8:1 gives the maximum cost benefit to the retailer and the customer. For the retail market, wrapped briquettes with customer specified labels are available. Cocopeat can be obtained in Low and High, EC Levels. Briquettes are available in 240g, 330g, 600g, 620g and 650g sizes.

### Advantages:

- 100% Natural organic growing medium which gives a higher volume when compressed
- High Expandability of Compressed Cocopeat Briquettes
- Briquettes are an ideal handy retail pack for home gardening, horticulture, floriculture etc.,
- Can be mixed with sand, compost, and fertilizer to make good quality potting soil
- Helps to keep the soil loose and airy that helps in better root growing
- Dry Coco peat is very hydrophilic and quickly absorbs water that makes easy to use
- High porosity and high-water holding capacity
- No Chemical added and no disposal problems as it is 100% biodegradable.
