Cocopeat Pellets

Coco Pellets are made from premium coco peat. This substance was created specifically for planting and is 100 percent biodegradable. It has a high ability for retaining water and is porous, which promotes the root system's rapid growth. As the plant develops, you can either transfer it straight to the growth medium or the grow cube. For pots and replacements, this product is ideal. Any of our pellets can be used as high-quality Green Peat Coco Coir Substrate by simply placing them in a pot or container and adding water until they grow up to several times their initial size. Ideal for plants such as fresh herbs, vegetables, and ornamental plants of all kinds.

Advantages:

- Excellent water retention capacity, reducing the need for frequent watering.
- Promotes rapid root development and healthy plant growth.
- Biodegradable and environmentally friendly.
- Easy to use simply add water and watch them expand.
- Versatile substrate for a wide range of plants, including herbs, vegetables, and ornamentals.
- Convenient and mess-free alternative to traditional soil.
- Suitable for both indoor and outdoor gardening.
- Helps maintain optimal moisture levels in the root zone.
- Enhances aeration and prevents soil compaction.
