

Coco Grow Poles

Coco Pole (Coir Pole, Moss Stick) is a spotting pole for potted plant creepers to grow indoors as well as outdoor gardens made by wrapping natural coir fiber in either forms of mattress fiber rubberized coir pads or coir yarn around a hollow PVC pipe. Coco Poles are support of vines, shrubs and any other plants that need a support to give them protection while they are growing. Coco poles are widely used in plant nurseries and horticulture farms. Also, they are ideal for supporting plants such as creepers or ornamental plants that are growing inside your home as decor on patios or in the garden. The high moisture retention capacity of the stick enables the roots of the pant to grip natural organic mattress of coir fiber. Coir poles are available with various diameters and lengths.

Advantages

- Being porous with higher water holding capacity helps the plant to develop many tiny roots throughout surface.
- Plants grow healthy with coir poles.
- Easily installs and replaces the traditional moss sticks.
- Coir poles give ideal support to plants while creating a perfect moist environment for its roots.
- Supporting plants such as creepers or ornamental plants that are growing inside your home as décor on patios or in the garden.

Product Name	Coco Grow Poles	
Material	100% Coir Wrapped in PP or Wooden Pole	
Size	Height - 40cm - 180cm and Diameter - 25mm - 50mm (Available with various diameters and lengths)
