

Coir Pots

They are manufactured from coconut fiber (extracted from the outer layer of the nut) and natural latex as the bonding agent. Coir Pots is a biodegradable and it is used for horticulture, in ornamental plant, vine and tree nurseries, as well as for the domestic gardening market. It has exceptionally high permeability to water, air, and roots. Coir Pots are used by those looking for faster cultivation, an excellent root system and re-establishment without any shock from transplanting. These pots are used along with Coco Disks as a readymade potting medium for seeding plantation in nurseries. The pots aid in excellent water retention and allowing easy breathing for the roots of the plants, hence the growth of the seed is faster.

There is no shock from transplanting, this difference is particularly marked when ground conditions are difficult (cold, drought, adverse season, etc.). There is no deformity in the root system, the plant establishes easily and settles into the soil better. Pots can be purchased in different sizes (volumes) and in a form suitable for either manual or automated soil filling.

Advantages:

- 100% Biodegradable and Transforms into Organic Matter on Decomposing.
- Hold more water, faster cultivation, excellent root system and re-establishment without any shock from transplanting.
- Roots have good protection and no deformity in the root system.
- Roots quickly penetrate the pot walls.
- Contact with the air stops the roots from growing (aerial root pruning)
- Indoor and Outdoor Plants Hydroponics Application.

Product Name	Coir Pots
Material	100% Coir and latex
Type	Flowerpot
Use for	Home Gardening, Greenhouses
Used With	Flower/Green Plant
Design Style	Modern
Packing	Cling wrap (polythene) or naked
Weight	As Buyer's request
Size	As per customer's requirement
Season	Farming Seasons
Services	OEM / ODM / Private Label
Customization	Possible
Specifications can be changed with the buyer's preferences	

Coir Basket Liners

These are Environmentally friendly products for indoor gardening. Liner baskets are available in Rubberized coir & Needled coir types and available with different sizes & specifications as per customer requirements. Coco coir liners provide excellent drainage & aeration to roots thus preventing root rot. This looks rich in natural color and frames are long lasting & colored with deep ink dye method.

We provide a cost-effective and very reliable alternative to expensive hanging baskets. They are biodegradable and eco-friendly. Coir hanging basket is a rubberized coir molded hanging basket in hemispherical shape.

Advantages:

- Holds in moisture and allows for good drainage and air circulation.
- Classic designs and Frames are metal construction and powder coated for rust resistant.
