

## Weed Control Mats

Mulching around trees is very important, as it helps the young tree to obtain the essential nutrients needed to survive the early stages of development. Mulching helps to suppress the growth of weeds around a tree's root system. Within the first three years of growth young trees need moisture in the growing medium around the tree. This moisture is needed by the tree as a feeding mechanism to carry minerals to its root system. If weeds are permitted to grow around the tree, they will take most of this moisture which will seriously reduce the tree's growth rate. A form of weed suppressant material will be of great benefit to the tree in its early stages of development allowing the moisture to fully aid the tree. This weeds suppressant will further benefit the young tree as it stops the growing medium around the tree from drying out and cracking which rapidly promotes water loss for the soil. This will allow the full root system of the young tree to become fully established and support fast growth rates throughout the tree's life.

### Advantages:

- 100% Biodegradable and Transforms into Organic Matter on Decomposing.
- Conserve water and give insulation and helps moderate moistures levels in the garden & Plants.
- Easily installed around your tree and protects from weeds and soil erosion give your tree a neat, manicured look without having to constantly weed and trim around the tree.
- This is made from mulching materials that are bonded together to form a tough, flexible mat that allows air, water, and nutrients to pass through, but effectively blocks weeds and grass.
- Promotes plant and seedling growth and reduces plant mortality.
- improves soil health and productivity.
- improves soil erosion problems.

Product Name	Coir Weed Mat	
Type	Rubberized Coir Sheets	
Form	Mats	
Material	Coir Fiber	
Thickness	800, 1000, 1200 gsm	
Packing	Cling wrap (polythene) or naked	
Weight	As Buyer's request	
Size	10cm to 90cm, As per customer's requirements	
Services	OEM / ODM / Private Label	
Customization	Possible	

**Specifications can be changed with the buyer's preferences**
