

Coco Grow Cubes

Coco Grow Cubes are crafted from premium cocopeat, making them an exceptional choice as a seedling base for root development. Designed primarily for plant nurseries. One of the key advantages of Coco Grow Cubes is their ability to significantly reduce the rejection rate of nursery plants. With the independent control of water and fertilization during the seedling phase, these cubes minimize the risk associated with transplantation and result in fewer plant rejections. Additionally, the cubes are easy to handle and can be placed directly on the growing media in the later stages, saving both time and money.

Coco Grow Cubes offer numerous advantages for optimal seedling development. Firstly, they promote rapid and dense root growth, providing an ideal environment for robust root systems and ensuring healthy and vigorous plant growth. The cubes also provide excellent control over watering and fertilization, allowing precise adjustments according to specific plant requirements.

Furthermore, Coco Grow Cubes are 100% organic and environmentally friendly. Made from natural and sustainable cocopeat, they offer an eco-conscious alternative and can be easily disposed of without harming the environment. The porous structure of the cubes enables enhanced nutrient absorption, ensuring that nutrients are readily available and easily absorbed by the plants, resulting in efficient nutrient uptake.

Additionally, Coco Grow Cubes have a high buffer capacity and retain a significant amount of water, which can be readily absorbed by the plants as needed. This ensures a consistent water supply and helps maintain optimal moisture levels, supporting healthy plant growth throughout the seedling stage.

Experience the advantages of Coco Grow Cubes and provide your seedlings with the optimal start they deserve. Enjoy rapid root growth, precise growing control, and an organic, environmentally friendly solution that maximizes plant health and reduces waste. Choose Coco Grow Cubes as the perfect seedling base for superior root development and successful nursery plant cultivation.

Advantages:

- Promotes rapid dense root growth.
- Excellent growing control for precise nutrient absorption.
- 100% organic and environmentally friendly.
- Nutrients are readily absorbed due to porous structure.
- Reduces rejection rate of nursery plants.
- Ideal for plant nurseries and seedling development.
- Compatible with coco peat growing media.
- Minimizes risk and improves seedling success.

Our Product Specifications

Product Name	Cocopeat Grow Cubes	Product Photo
Brand Name	Greenpeatcoco	
Material	Cocopeat	
Type	Cubes	
Moisture	Less than 20%	
EC Level	For Seed Germination	
Used With	Flower/Green Plant	
Design Style	Modern	
Plants	Flowers, Fruits, and Vegetables	
Size	10x10x8 cm, 8x8x6 cm, as per the buyer's preference	
Packing	Cling wrap (polythene) or naked	
Season	Farming Seasons	
Services	OEM / ODM / Private Label	
Customization	Possible	

Specifications can be changed with the buyer's preferences
